By Kindle Customer Riggh pulled off the amazing trick of making a subject the reader wasn't particularly interested in into something page-turning?. If you love the sea or even if you have never really given it much thought, you'll love this book. Mr. Riggh, please give us Book 2! 1 of 1 people found the following review helpful. Very surprised how quickly this book grabbed me By Customer A fun nautical read for young adults (or young at heart adventure lovers) about a boy with unique abilities (don't want to give the plot away) who is more at home on the ocean than on land. The dysfunctional world of adults forces his hand to flee circumstances in Florida and set out on an Odysseus-like journey to try to reach his ancestral home in Puerto Rico. The main character is a 16 year old self-reliant open water survivalist/sailor (think Into the Wild but on the open seas) who is extraordinarily capable but yet very human even with his special gift. Like every reluctant superhero he struggles with a rich backstory filled with disappointment, courage, and obstacles. If you like adventure novels, this is a great read. If you like adventure novels AND you like sailing...well your life will not be complete until you read this book. 1 of 1 people found the following review helpful. Fantastic story and characters! Loved this book!! By Globalokie Although this is not normally my preferred genre, I really loved this book. The story line and characters are superb, and when I had to put it down, I found myself constantly wondering what Jamie would do next. Although published as a Young Adult novel, it certainly captured my imagination and curiosity. Riggh throws in subtle life lessons and practical knowledge related to many topics, especially sailing, diving, science, and life in general. I really enjoyed this story and highly recommend it! It should be in school libraries to capture students' spirit of adventure and imagination. As a traveler, teacher, father, and lover of adventure...trust me, pick this book up. Can't wait for Book Two!!!

Magic or Mutation? Jamie Bonifacio lives between two worlds; the world of the terrestrial and the world of the aquatic. Whether the result of being cursed at birth by a Santeria Priestess, or the result of a radical genetic mutation, Jamie possesses the preternatural ability to dive to incredible depths, and stay at those depths for hours. How many hours? Even Jamie isn't sure. When, through no fault of his own, Jamie finds himself at odds with the law, he realizes that his only chance to remain free is to take refuge on land; and under the sea. Equipped with a twenty-two foot sailboat, sparse sailing skills, and an audacity possessed by few, Jamie will take flight toward the ancestral home that lies across the Caribbean Sea. What Jamie doesn't know is that before him lie two-thousand sea miles of

hurricane winds, tortuous tropical sun, castawayshellip;and pirates.
